UP-TO-DATE WITH RACETECH

Dear sponsors, friends and supporters,

In this newsletter you can read about how our team participated in the event registration for the summer competitions. On January 28th, we successfully completed registration quizzes online in five targeted competitions.

We also have a great promotion going on right now: with every new LiPo sponsorship, you can now get a calendar again!

We hope you stay healthy and enjoy reading!

EVENT REGISTRATION 2022

On 28th January 2022, similar to the last year, we were able to take part in the registration quizzes for the various European events from home via various online communication services. Due to our world ranking, we were already pre-registered for an event. However, to get a good place at the scrutineering and our desired start number, we had to answer a few questions regarding the rules and engineering and electrical tasks. We are now pleased to announce that we will be taking part in the FSN in Assen and the FSG in Hockenheim this summer. Be assured that we will keep you informed about further developments regarding the organization of the competitions.

Lithium polymer battery (LiPo)

LIPO ACTION

The accumulator is the centerpiece of our racing car and consists of 284 lithium polymer cells (Li-Po) which are assorted in so-called stacks to provide energy to our car. These are connected to 142 cells in series and 2 cells in parallel.

Become a sponsor for one or more of these RT15 battery cells and receive a Racetech calendar for 2022 with detailed photos of the RT14! By offering this LiPo sponsorship we want to offer the opportunity to be a part of the project, with a small effort of 30 € per cell, and to support us with our first vehicle with CFRP monocoque.
